TCR	Total Coliform Rule
VA	Vulnerability Assessment
WIFA	Water Infrastructure Finance Authority of Arizona

# **CAPACITY DEVELOPMENT PROGRAM GOVERNOR'S REPORT FY 2012 - 2014**

## **1. EXECUTIVE SUMMARY**

This report describes the methods and strategy applied by the Arizona Department of Environmental Quality (ADEQ) from October 1, 2011 through September 30, 2014 to ensure adequate technical, managerial, and financial capacity of new public water systems (PWSs) mandated by Title 18, Chapter 4 of the Arizona Administrative Code (A.A.C.) and existing PWSs mandated by § 1420(c)(3) of the Safe Drinking Water Act (SDWA), 42 U.S.C. § 300g-9.

In applying capacity development for new PWSs, ADEQ must evaluate an elementary business plan submitted by each new PWS that addresses the following three elements:

1. Technical Capacity
2. Managerial Capacity
3. Financial Capacity

In developing and implementing capacity development for existing PWSs, the State of Arizona's strategy must "*consider, solicit public comment on, and include as appropriate*" the following five elements:

1. Methods or criteria to prioritize systems
2. Factors that encourage or impair capacity development
3. How the State will use the authority and resources of the SDWA
4. How the State will establish a baseline and measure improvements
5. Procedures to identify interested parties

ADEQ's resources are continuously updated to improve a PWSs capacity through the following:

- Collecting and evaluating information
- Identifying factors that encourage or impair water system capacity
- Implementing the strategy
- Annually evaluating the strategy
- Developing changes and improvements to the strategy
- Measuring strategy results and efficacy

An assessment of each existing PWS is conducted and compiled annually on a Master Priority List (MPL). The MPL is used to determine which water systems are in need of the most assistance.

The following tasks were completed over the evaluation period:

1. Compiled the 2012, 2013, and 2014 annual Master Priority Lists of community (CWS) and nontransient, noncommunity (NTNCWS) water systems

2. Provided technical assistance through an annual grant from the U.S. Environmental Protection Agency (EPA) and administered by the Water Infrastructure Finance Authority of Arizona (WIFA)
3. Conducted public outreach to educate and disseminate regulatory information to owners and operators of public water systems
4. Conducted workshops to educate and assist small PWSs in preparing a vulnerability assessment (VA) and an emergency management plan (EMP)
5. Compiled an annual list of new public water systems that are approved to operate after completing an adequate demonstration of technical, managerial, and financial capacity through submission of an elementary business plan
6. Completed the annual report for the Operator Certification Program
7. Completed the annual report for the Capacity Development Program
8. Measured the success of the Capacity Development Program since its inception

## 2. CAPACITY DEVELOPMENT PROGRAM

EPA summarizes the Capacity Development Program with the following description:

*“Capacity development is a State effort to help drinking water systems improve their finances, management, infrastructure, and operations so they can provide safe drinking water consistently, reliably, and cost-effectively. More specifically, the capacity development provisions provide an exceptionally flexible framework within which States and water systems can work together to ensure that systems acquire and maintain the technical, financial, and managerial capacity to consistently achieve the health objectives of the 1996 Safe Drinking Water Act.”*

### 2.1 Capacity Development for New Systems

ADEQ is responsible for approving the technical, managerial, and financial elements of a capacity development application for a new PWS. Capacity Development for new systems is based on Arizona stakeholder input for an Elementary Business Plan which details the components for facility operations and management to serve safe drinking water for communities. Typically, the capacity development process occurs in conjunction with the Drinking Water Engineering Review Unit's evaluation of the infrastructure plan and specifications for a public water system facility. Only new PWSs that begin operation after October 1, 1999, are required to submit an elementary business plan. Newly discovered facilities that were in operation prior to October 1, 1999, are not required to submit an elementary business plan per A.A.C. R18-4-601.

A completed capacity development application and any supporting documentation in an elementary business plan are required to assess the technical, managerial, and financial capacities of a proposed facility. Since each facility is unique, the requirements may be met in a variety of ways. The Capacity Development Coordinator works with each applicant to ensure that these requirements are met. When a representative of a prospective facility submits construction plans to the Drinking Water Engineering Review Unit for approval, the submittal package is checked to make sure that all of the elements required for approval are included. The Elementary Business Plan is then distributed to the Capacity Development Coordinator for administrative and substantive review.

### 2.1.1 Results

For the period of October 1, 2011 through September 30, 2014, five new facilities were evaluated and determined to have adequate technical, managerial, and financial capacity pursuant to Title 18, Chapter 4, Article 6 of the A.A.C. This represents a substantial decrease when compared to the nine facilities approved during the previous reporting period of 2008-2011, which can be largely attributed to the economic downturn. These PWSs were approved to operate as public water systems in Arizona, and a list of these facilities is shown in Table 1.

**Table 1. List of PWSs approved for Capacity Development from October 2011 through September 2014.**

<b>Public Water System (CWS, NTNCWS)</b>	<b>County</b>	<b>Approval</b>
Avalon Garden Water System	Santa Cruz	9/24/13
Star School	Coconino	12/24/13
Florence Copper	Pinal	8/9/13
Banner Health	Maricopa	1/30/14
Mesa Hills Estates	Navajo	6/11/14

## **2.2 Capacity Development for Existing Systems**

Capacity Development for existing systems is based on select Elementary Business Plan elements, offered through education and assistance programs, and regulatory compliance assistance, to maintain and improve drinking water system operations in drinking water systems statewide.

### 2.2.1 Monitoring Assistance Program

All community and non-transient, non-community public water systems, which are not federally or state-owned and that serve 10,000 or less people, are enrolled in the Monitoring Assistance Program (MAP). For a modest base fee and an additional charge per service connection, MAP conducts all baseline monitoring for regulated volatile organic (VOC), synthetic organic (SOC), and inorganic (IOC) chemicals in addition to nitrate, nitrite, asbestos, and radionuclides. This program has dramatically reduced the number of PWSs that would otherwise be in noncompliance with monitoring and reporting requirements for these rules.

### 2.2.2 Master Priority List Criteria

Since 2000, an inventory of active public water systems affected by capacity development is compiled annually. A list of criteria is selected and applied to each public water system. Each criterion is assigned a specific point value on the basis of its potential impact to public health -- the more points a PWS is assigned, the higher it is ranked on the MPL. A summary of the criteria used for the MPL, and their respective points are shown in Table 2. For a detailed explanation regarding the criteria used to determine the score for a public water system, please see Appendix A. The criteria used to determine PWS needs are the same criteria used in determining existing PWS capacity. The 2014 MPL is attached as Appendix B.

The MPL is updated annually so that prioritization can be based off the most recently available data. In addition, WIFA uses the MPL to identify possible candidates for additional technical assistance and/or financial assistance (like low interest loans).

**Table 2. MPL Criteria Scoring**

Initial Monitoring Year		System Type	
<1999	5	Community (CWS)	5
≥1999	0	Nontransient, noncommunity (NTNCWS)	0
Source Water		Population Served	
Surface Water	5	≤ 500	20
Groundwater or purchased water	0	501-3,300	15
		3,301-10,000	10
		≥10,001	0
Owner Type		Certified Operator	
Private	10	YES	0
Mixed	5	NO	10
Federal, State, Local	0		
Enforcement Targeting Tool (ETT) Score		MCL Violation	
ETT Score	January 2014 ETT Score	Non-acute	5
		Acute	20
O&M Violation		Participation in MAP	
Open Minor Violation	5	YES	0
Open Significant Violation	15	NO	5
ADEQ Technical Assistance			
YES	0		
NO	10		

### 2.2.3 Technical Assistance / System Evaluation

Assigning a priority to a water system's capacity is the initial step in assisting a public water system. The next step is providing resources under which a water system may attempt to improve its capacity. The Technical Assistance rule was developed to allow Arizona to distribute federal technical assistance funds to public water facilities for technical, managerial and financial capacity improvements. The Drinking Water Section uses the MPL criteria to determine which systems are in greatest need of assistance. Funding for this program is provided annually by EPA and administered through WIFA for the ADEQ Drinking Water Section.

The majority of technical assistance comes in the form of a System Evaluation (SE). A system evaluation is conducted by a state-approved third-party contractor and consists of a thorough review of all aspects of a public water system including physical characteristics, technical, financial, and managerial capacity, security concerns, ownership, training and other aspects of a water system. PWSs are prioritized for technical assistance according to their ranking on the MPL. A copy of the SE form is located in Appendix C. In addition to the MPL, a PWS may be selected for a SE on the basis of a recommendation from WIFA, or a referral from ADEQ Drinking Water Section staff or Compliance Section staff. A PWS may also request a SE on its own merit.

Upon completion of an SE by a third-party contractor, the Capacity Development Coordinator is debriefed on the results, and the system is provided with both a hard copy and electronic version of a summary report with prioritized recommendations, facility schematics, facility photos, and SE forms

containing supporting documentation. Nearly all evaluated systems require improvement in one or more of the three capacity elements with most recommendations focusing on technical capacity.

With prior ADEQ approval, additional funds may be allotted for the contractors to prepare facility-specific Operations and Maintenance (O&M) packages, which include: a facility schematic and description, a site sampling plan, an organizational chart, a list of operator tasks, an operations and maintenance plan, an emergency operation plan, a vulnerability assessment/emergency response plan, and a backflow prevention and cross connection control program plan. For this reporting period, 24 PWSs received technical assistance in the form of a SE with varied combinations of five O&M Packages, five Nitrate Treatment Evaluations (NTEs), one Radionuclides Treatment Evaluation (RTE) and one Disinfection By-Products (DBP) Treatment Evaluation.

Seven public water systems were referred by Drinking Water and Compliance staff for technical assistance in the form of system and treatment evaluations. Treatment evaluations consisted of an examination of feasible treatment options for the PWS as well as estimated ongoing operational and maintenance costs associated with each treatment option.

#### 2.2.4 Continuing Education and Workshops

ADEQ conducts technical workshops statewide and also conducts workshops with other governmental agencies, trade associations, and nonprofit organizations to improve the capacity of existing PWSs. In addition, the Drinking Water Programs Unit (DWPU) sponsors a monthly workshop/training session at ADEQ's Phoenix office aimed primarily at the state's approximately 6,500 certified operators to provide a source of continuing education. In addition to the training courses, each audience member has an opportunity to raise issues and ask questions specific to their geographic area of the state.

Partnerships developed with other entities are used to assist PWSs through the use of additional resources and funding. Many of these partners are located regionally. This not only gives PWSs a resource that is close by but also provides a level of comfort since PWSs may already be familiar with the partner. A total of 39 outreach events were conducted between 2012 and 2014, attended by approximately 1,687 persons. The number of outreach events and the number of attendees by calendar year since 2000 is shown in Table 3. Attendance decreased by 58% over the previous three-year (2009-2011) reporting period. This is primarily due to the discontinuance of the Expense Reimbursement Grant in June 2012.

**Table 3. Number of Outreach Events and Attendees by Calendar Year**

CALENDAR YEAR	EVENTS	ATTENDEES	AVG. ATTENDANCE
2000	12	276	23
2001	12	324	27
2002	43	2,285	53
2003	51	2,195	43
2004	28	1,329	47
2005	24	1,307	54
2006	51	2,463	48
2007	39	2,244	57
2008	21	1,308	62
2009	22	1,172	53
2010	28	1,439	51
2011	26	1,367	53
2012	12	763	64
2013	17	482	28
2014	10	442	44
<b>TOTAL</b>	<b>396</b>	<b>19,396</b>	<b>49</b>

### 2.2.5 Public Outreach and Customer Service

Public outreach differs from technical education in the content presented. Public outreach consists of disseminating information that can be used by water consumers as well as water purveyors, and is accomplished through face-to-face interaction, and communication via electronic media, and written correspondence. The objective of circulating this type of information in an efficient and effective manner is two-fold. First, by making information readily available in an easily understood format, regulatory violations like missed compliance monitoring for regulated contaminants can be prevented. If a violation should occur, compliance can be achieved more rapidly. Secondly, the availability of operator and compliance information through the internet allows staff to focus their attention on other activities.

Furthermore, ADEQ Drinking Water Section staff participate in ongoing water-related educational efforts at the elementary through college levels. ADEQ instructors present material covering topics such as hydrological cycle, uses of water, sources of water, nonpoint source pollution, conservation, and recycling. A groundwater flow model may also be used in conjunction with a presentation to provide the students with a visual representation of how water is used. Finally, professional careers in the fields of drinking water and wastewater treatment, drinking water distribution and wastewater collections are discussed thru the local Maricopa County Community College system.

Customer service is provided on a daily basis via telephone calls, letters, e-mails and requests for public records. Staff members receive questions on a wide variety of topics related to drinking water and respond to these queries in an accurate, professional and timely manner.

### 2.2.6 Web site Data Access

All of the forms and applications related to PWS capacity development like elementary business plan, compliance monitoring data forms, operator certification renewals, etc. are available on the ADEQ Web site. The ability for the regulated community -- water system operators, managers, owners, etc. -- to readily access this information on their own allows staff to focus on higher priority issues.

Public water systems participating in ADEQ's monitoring assistance program (MAP) may access the ADEQ Web site to review current monitoring schedules, violations, facilities, facility flows, sanitary surveys, administrative contact information, and monitoring data, etc., via a web-based version of ADEQ's current drinking water database, Safe Drinking Water Information System (SDWIS/State). Efforts are ongoing to eventually provide access to view additional information such as any monitoring waivers that are in effect for their systems. In addition, all Arizona-licensed certified operators are able to check their current certification status, expiration dates, and contact information via links on ADEQ's Operator Certification Web page. Fiscal reports for some PWSs can also be obtained from the Arizona Corporation Commission (ACC) or WIFA.

The items and documents posted on the ADEQ Web site by the Drinking Water Section are accessed regularly by the regulated community and general public. Moreover, the capacity development staff has identified electronic media as one of the major tools that can be maximized to enhance the capacity of all public water systems.

## **3. DRINKING WATER RULE SPECIALISTS**

In 2006, a reorganization of the Water Quality Division resulted in the transformation of the Source Water Assessment and Protection Unit into the Drinking Water Monitoring and Protection Unit (DWMPU). Restructuring of the unit combined the existing Source Water Assessment Program (SWAP) and Source Water Protection Program (SWPP) activities with drinking water rule oversight duties such as monitoring and reporting. This restructuring was intended, in part, to decrease the number of PWSs labeled as being in significant non-compliance (SNC) due to the accrual of unresolved monitoring violations. As part of the individual rule regulation, Drinking Water Rule Specialists were appointed to oversee individual rules. The oversight of individual rules included one-on-one assistance to system operators, managers and board members to enable them to understand the highly complex rules and steps necessary to achieve compliance with water quality standards, monitoring and reporting. Each rule specialist is responsible for understanding applicable regulations and applying current department procedure/policy for one or more categories or groups of contaminants. Rule specialists also provide statewide outreach for public and private entities and with technical assistance and financial assistance providers. DWMPU staff also work closely with department inspectors, enforcement staff, data coordinators, and regulators at Maricopa County Environmental Services Department and Pima County Department of Environmental Quality, to resolve identified operational and managerial issues with regulated systems. The increase in compliant PWSs and reduction in SNCs are due in large part to the work of the Drinking Water rule specialists.

## 4. VULNERABILITY ASSESSMENT AND EMERGENCY MANAGEMENT PLANNING

An important part of a PWS's capacity is the development of a reliable vulnerability assessment and emergency management plan (VA/EMP). A VA assists water systems in evaluating their susceptibility to potential threats and in identifying corrective actions to reduce or mitigate the risk of serious consequences from vandalism, insider sabotage, natural or man-made disasters, or terrorist attacks. As required under the Bioterrorism Act of 2002, a community PWS serving more than 3,300 persons must:

- Conduct a VA, certify to EPA that the assessment has been completed, and submit a copy of the assessment to EPA.
- Show that the system has updated or completed an EMP outlining response measures if an incident occurs and certify to EPA that the plan has been completed.

Although it is not a requirement of the Bioterrorism Act, water systems are strongly encouraged to regularly review and update their VA/EMPs.

Since March 2003, ADEQ has provided VA and EMP training to PWSs in Arizona. Each workshop is tailored to specific community needs and includes speakers with local expertise on such topics as fuels and fires, emergency planning coordinators (their functions and resources), enforcement officials, and municipal and private entities. Form templates are provided to each attendee in hard-copy and an electronic format along with other VA/EMP-related resource materials.

One of the main templates used is the *Security Vulnerability Self-Assessment Guide*. This guide is designed to help small water systems determine possible vulnerable components and identify security measures that should be considered. This document is designed particularly for public water systems that serve between 3,300 persons and 50,000 persons. A VA is voluntary for systems serving less than or equal to 3,300 persons. However, ADEQ encourages these systems to use this document to review their vulnerabilities. To date, all 133 PWSs required to complete a VA/EMP have done so.

Between October 1, 2011 and September 30, 2014, nine VA/EMP workshops were conducted in Arizona communities attended by approximately 280 participants. In addition to PWS representatives, ADEQ also encourages the owners and operators of wastewater facilities to participate. Training is conducted by persons recognized as experts in their respective fields and training topics for each workshop include:

- Federal requirements
- State programs
- Available resources
- Guest speakers
- Tabletop simulation exercises

## 5. REPORTING CRITERIA & STATISTICS

The criteria selected to establish a baseline and measure the success of this strategy are shown in Table 4. The baseline data was collected from years 1998 and 1999. In general, the data indicates that the efforts performed under this strategy are increasing overall PWS capacity. In addition, a major program factor in maintaining and improving capacity for drinking water systems is the creation of Drinking Water Rule Specialists to assist operators, owners, and managers and understand water quality requirements to supply safe drinking water to communities.

**Table 4. Criteria Measuring the Success of the Capacity Development Program**

Item	Criteria	PERIOD 1 2000-2002	PERIOD 2 2003-2005	PERIOD 3 2006-2008	PERIOD 4 2009-2011	PERIOD 5 2012-2014	Δ from PERIOD 4
1	Number of Outreach Events	67	101	111	76	39	-49%
2	Number of Attendees at Events	2,885	4,701	6,015	3,978	1,687	-58%
3	PWSs with MCL violation (non-TCR)	91	54	100	121	92	-24%
4	PWSs with significant noncompliance (SNC) violation	1047	919	885	585	NA	NA
5	Maximum number of PWSs without a certified operator	139	211	156	19	22	16%
6	PWSs that received WIFA assistance	116	74	85	66	73	11%
7	PWSs that received ADEQ assistance	0	49	8	68	19	-72%
8	Number of PWSs with a source water protection program	29	37	272	300	348	16%
9	Number of PWSs that have received their SWAP report	290	Completed	N/A	N/A	N/A	N/A
10	Average PWS score on the MPL	54	49	58	59	49	-17%

The following points summarize the data in Table 4:

- Items 1 and 2 – Number of events decreased substantially for Period 5 versus Period 4. The decrease in persons receiving either training and/or other information decreased by a similar percentage. This decrease is primarily due to the discontinuance of the Expense Reimbursement Grant thus reducing the available overall training budget in June 2012.
- Items 3 and 4 – The total number of MCL violations decreased over the previous period. This result is primarily due to systems meeting compliance with the revised arsenic MCL of 10 ppb which

went into effect January 23, 2006. Monitoring to determine compliance with the new arsenic standard was required to be completed no later than December 31, 2007, and subsequent MCL violations were recorded beginning in 2008. The significant non compliance (SNC) violation is no longer used and has been replaced with the ETT score, therefore an entry of not applicable (NA) is noted.

- Item 5 – The Drinking Water Section is working proactively with PWSs to either secure the services of a certified operator or to train an existing employee to become a certified operator. Increased efforts implemented in 2011 have continued to keep the number of PWS's without an operator to a significantly lower level than during Periods 1 through 3.
- Items 6 and 7 – The number of PWSs receiving WIFA assistance increased with 39 systems receiving loans 34 systems receiving technical assistance. The number of PWSs receiving technical assistance from ADEQ decreased significantly compared to the previous reporting period. The primary reason for the decrease is due to ADEQ procurement program reassessment of water related procurement processes and procedures delaying awarding of tasks to engineering contractors.
- Items 8 and 9 – These criteria are both long range indicators of capacity improvement and should eventually have a positive impact once the measures reflect compliance rates. The SWPP begins with the initial SWAP reports and updates and expands from there. The exponential increase of PWSs participating in SWPP is due in large part to an EPA approved change in the definition of a successfully implemented SWPP.

X State Definition of Substantial Implementation of the Source Water Protection Program: "A targeted measure or action that strives to protect a surface water or ground water source from contamination...ADEQ Drinking Water Monitoring & Protection Unit (DWMPU) staff determines on a case-by-case basis if the documented actions or the SWP Plan are protective of the source and have begun implementation."

- Accordingly, all applicable PWSs that have completed a SWPP, are under one of the six programs areas of concentration, or are in the process of implementing a SWPP are included in the overall count.

X ADEQ's SWP six program areas are defined as: Most Prevalent and Most Threatening Contaminant Risks; Underground Storage Tank (UST)/Leaking Underground Storage Tank (LUST) Data Evaluations; Non-Petroleum Data Evaluations; School Outreach; GPS Well Project; and Database Query.

- Item 10 – This metric is not considered to be especially useful as an indicator of strategy effectiveness as the criteria used to determine a PWS's MPL score have changed throughout the years as new compliance assessment tools, such as the EPA's ERP list, are developed and incorporated into the MPL scoring criteria. Therefore, the MPL score components are not consistent between reporting periods and should not be directly compared.

A water system's capacity improvement can be readily measured in a generalized manner for the PWSs under Arizona's jurisdiction. This enables the program to describe the success of the capacity development strategy and the progress made toward improving the technical, managerial, and financial capacity of all Arizona PWSs. It is, however, important to note that some aspects of capacity development such as training for asset management, water conservation, emergency management, etc.

may take several years to develop and mature at individual PWS levels before overall improvements to compliance measures are observable.

Arizona's Capacity Development Program is robust and continues to improve, in the quality and effectiveness of the programs given the dynamic nature of the drinking water program as a whole.

**APPENDIX A**  
**MASTER PRIORITY LIST (MPL) CRITERIA**

## **MASTER PRIORITY LIST CRITERIA**

An inventory of public water systems affected by capacity development is compiled at the beginning of each calendar year. A list of criteria is applied to each public water system. Each criterion is assigned a specific point value on the basis of its potential impact to public health--the more points a PWS is assigned, the higher it is ranked on the MPL. Until May 2004, all of the data used to rank PWSs existed in the Arizona Safe Drinking Water (SDW) database. Since May 2004, the Department has migrated to a new database-- the Safe Drinking Water Information System (SDWIS). Several of the criteria used to compile the MPL historically are no longer available. New criteria for the MPL have been selected and identified below.

### ***Initial Monitoring Year***

An initial monitoring year is the calendar year designated by the Department within a compliance period in which a public water system conducts initial monitoring at an entry point to the distribution system (EPDS). The earlier an initial monitoring year occurs, the more points are assigned. For example, the Phase II and Phase V testing guidelines required a PWS to conduct initial sampling in 1993. Because of the complexity of this rule, many PWSs between 1993 and 1998 missed a portion of their sampling and reporting, which resulted in some type of compliance violation being assessed to the water system.

A PWS that is assigned an initial monitoring year after October 1, 1999, is required to file an elementary business plan pursuant to Title 18, Chapter 4, Article 6 of the Arizona Administrative Code. Since these systems are evaluated for capacity before being approved to operate, they are assigned zero points. Systems that became active between January 1, 1999 and September 30, 1999 are also assigned zero points because the Monitoring Assistance Program (MAP) and other compliance assistance programs were already in place prior to the Capacity Development rule going into effect. Systems in operation prior to 1999 are assigned five points as they were not required to be assessed for capacity.

### ***System Type***

A public water system has at least 15 service connections or regularly serves an average of at least 25 individuals at least 60 days out of the year. A public water system is either a community water system or a noncommunity water system.

A community water system (C) serves at least 15 service connections used by year-round residents or regularly serves at least 25 year-round residents. In general, these systems supply water to single family homes, trailer parks, and residential subdivisions. A community system is assigned a value of five points due to this year-round exposure.

A non-transient non-community water system (NTNC) regularly serves at least 25 of the same persons over 6 months per year. In general, these systems supply water to schools and places of employment. A PWS that is a nontransient noncommunity water systems is assigned zero points.

A transient noncommunity water system (NC) does not regularly serve at least 25 of the same persons over six months of the year. In general, these systems supply water to restaurants, rest areas, and other cyclical businesses. Since NC systems are not required to be included in this strategy, they are excluded from the MPL. The Department acknowledges that certain NC systems may require some type of assistance and will determine the needs of each NC system on a case by case basis.

### ***Source Water***

Surface water is more sensitive to contamination than groundwater or water that is purchased from another PWS. As a result, more complex and frequent monitoring is required. A PWS that obtains all or a portion of its drinking water from a surface water source is a higher risk because of the vulnerability of the source water to contamination and accordingly is assigned 5 points. A PWS that obtains all of its drinking water from a groundwater source is assigned zero points because groundwater is considered less susceptible to contamination.

### ***Population Served***

Although small PWSs (those serving 3,300 persons or less) supply drinking water to only a small percentage of the population in Arizona, they encompass the overwhelming total number of active PWSs in the state. These PWSs also disproportionately receive the majority of compliance violations due to their limited technical, managerial, and financial capabilities. The population served by a PWS is generally inversely related to the number of noncompliance violations (e.g. smaller PWSs have the most amount of violations). Consequently, PWSs serving 500 persons or less are assessed twenty points, those serving between 501 and 3,300 persons are assessed fifteen points, those serving 3,301 to 10,000 persons are assessed ten points, and PWSs serving greater than 10,001 persons are assessed zero points.

### ***Owner Type***

The type of PWS owner is an indicator of capacity since an owner's decisions and available resources directly impact a PWS's capacity. Privately owned PWSs are assessed ten points as they generally have limited means of raising revenue other than through utility rates and are generally disadvantaged with regard to capacity when compared to their public/private and public counterparts. Mixed (public/private) ownership types are assessed five points, and publicly owned (federal, state, local, etc.) are assessed zero points.

### ***Certified Operator***

A public water system must have a certified operator of the correct type and grade based on the system classification pursuant to Title 18, Ch.5, Article 1 of the A.A.C. Operators are responsible for making all decisions about process control or system integrity regarding water quality or water quantity that affects public health. A system that does not have a certified operator is assigned ten points while a system that has an on-site operator or a remote operator is assigned zero points.

### ***Enforcement Targeting Tool (ETT) Score***

The ETT score is a new enforcement tool developed by the U.S. EPA to identify public water systems with violations that rise to the level of significant noncompliance by focusing on systems with health-based violations, and those that show a history of violations across multiple rules. This system-based approach assigns a weight or number of points based on the assigned threat to public health. The ETT score formula incorporates all open-ended violations (i.e. those that have not been returned to compliance or are not on "the path to compliance") over the past five years. PWSs with scores greater than 11 are deemed to be in significant noncompliance. PWSs are assessed the same number of points as the most recent ETT Score.

### ***MCL Violation***

Violations of a contaminant's maximum contaminant level (MCL) are given additional weight apart from their impact on the ETT score as they have a significant impact on public health. PWSs with unresolved acute (coliform, nitrate, or nitrite) MCL violations within the past three years are assessed twenty points, and those with non-acute MCL violations are assessed five points. PWSs with no unresolved MCL violations in the past three years are assessed zero points.

***O&M Violation***

Significant and minor Operation & Maintenance (O&M) violations are assessed at 15 and five points, respectively as they have a potential impact to the system and ultimately water quality. PWS's without an open O&M violation are assessed at zero points.

***Participation in Monitoring Assistance Program (MAP)***

All public water systems (community and non-transient non-community [excluding State or Federally owned]) serving less than 10,000 people are required to participate in the program. All other public water systems may opt into MAP if they choose. PWS participating in MAP are assessed at zero points, while systems not participating in MAP are assessed five points.

***ADEQ Technical Assistance***

PWSs that have previously received technical assistance from ADEQ are assigned zero points. Those systems that have not received any assistance are assigned ten points. This allows PWSs that have not received any prior ADEQ technical assistance to have higher priority on the MPL.

# ARIZONA SYSTEM EVALUATION 2010

<b>PART I. WATER SUPPLY</b>			
What is your primary source of water?	Ground	Surface	GWUDI
<b>PURCHASED WATER</b>			
1. Do you purchase water?	YES	NO	N/A
2. Do you have a contract to purchase water?	YES	NO	N/A
3. Do you keep records on the amount of water that you purchase?	YES	NO	N/A
4. Can you purchase an adequate supply during periods of drought?	YES	NO	N/A
5. Do you have an alternative source of supply?	YES	NO	N/A
6. Do you know the long-term plans of your supplier?	YES	NO	N/A
<b>WATER QUANTITY</b>			
1. Are water rights sufficient and secured?	YES	NO	N/A
2. Is the quantity of water available from your water source adequate for the next five years?	YES	NO	N/A
3. Do you know the safe, reliable yield of your source(s)?	YES	NO	N/A
4. Do you know how much water you pump on average per day?	YES	NO	N/A
4A. Enter the amount:			
5. Do you know your source capacity (including purchased water) in gallons per day (gpd)?	YES	NO	N/A
5A. Enter the amount:			
6. Is your source capacity greater than your peak daily demand?	YES	NO	N/A
7. Were you able to provide adequate volumes of water during any recent droughts?	YES	NO	N/A
8. Is there a water conservation plan? If yes, describe in final report.	YES	NO	N/A
9. Do you have a 10-year growth projection of your service area, customer base, and water demands which is consistent with local land use plans?	YES	NO	N/A
<b>WATER QUALITY</b>			
1. What is the date of your last sanitary survey?			
2. Have you corrected the deficiencies, if any, noted on your last sanitary survey?	YES	NO	N/A
3. Has your system had a violation of the National Primary Drinking Water Regulations in the last year?	YES	NO	N/A
4. If yes, do you have a plan to ensure compliance?	YES	NO	N/A
5. Do you know who to contact for information on regulatory requirements and drinking water standards?	YES	NO	N/A
6. Has a wellhead protection plan been initiated or completed?	YES	NO	N/A
7. Do you know the provisions for obtaining waivers from monitoring requirements?	YES	NO	N/A

## ARIZONA SYSTEM EVALUATION 2010

8. Do you have a Source Water Assessment and Protection Program (SWAP) plan?	YES NO N/A
9. Do you have a SWAP report showing your sources of supply and all existing and potential sources of contamination?	YES NO N/A
Are the areas that affect your source water free from:	
10. Discharges from human wastewater treatment facilities?	YES NO N/A
11. Agricultural feedlot waste treatment facilities?	YES NO N/A
12. Golf courses?	YES NO N/A
13. Corporate or institutional campuses?	YES NO N/A
14. Industrial, commercial, or agricultural chemicals?	YES NO N/A
15. Landscaped residential developments?	YES NO N/A
What distance is the water source from:	
16. A septic tank?	_____ feet N/A
17. A municipal sewer?	_____ feet N/A
18. An underground Storage Tank?	_____ feet N/A
19. A hazardous waste facility?	_____ feet N/A
Describe in the final report contaminants that may affect the water source.	

# ARIZONA SYSTEM EVALUATION 2010

<b>PART II. TECHNICAL CAPACITY</b>			
<b>OPERATIONS AND MAINTENANCE</b>			
1. Does the system have an operations and maintenance plan to address site-specific component replacement or repair protocols based on manufacturer's recommendations or engineer's specifications?			YES NO N/A
1A. If yes, when was last update?			
2. Do you have a schedule for maintenance, repair, and rehabilitation of all your facilities?			YES NO N/A
3. Does your system have a certified operator with the correct classification and grade?			YES NO N/A
3A. Describe in final report, including the operator certification identification number.			
4. Does your operator attend continuing education training sessions?			YES NO N/A
4A. Describe in final report.			
<b>DISINFECTION</b>			
1. Does the facility disinfect?			YES NO N/A
1A. If yes, indicate which type.		NaOCl liquid	CaOCl solid    Cl <sub>2</sub> gas
2. Is the facility chlorinating as required?			YES NO N/A
3. Is the disinfection compound approved for use?			YES NO N/A
4. What is the contact time in minutes?			_____ minutes or N/A
5. Is there a 'free chlorine residual' daily log?			YES NO N/A
6. Is there adequate chlorine residual?			YES NO N/A
7. Is a chlorine test kit available?			YES NO N/A
8. Does the facility have a chlorine injection nozzle?			YES NO N/A
9. Is the line plugged?			YES NO N/A
10. Is there a standby chlorinator?			YES NO N/A
11. Is the required chlorinator installed?			YES NO N/A
12. Is the chlorine feed tank empty?			YES NO N/A
13. Is the equipment properly installed?			YES NO N/A
14. Is the equipment operating properly?			YES NO N/A

# ARIZONA SYSTEM EVALUATION 2010

<b>Cl<sub>2</sub> gas</b>		
1. Is the dosing cylinder empty?	YES	NO N/A
2. Is the room properly vented?	YES	NO N/A
3. Is the chlorinator subject to freezing?	YES	NO N/A
4. Is there an inspection window?	YES	NO N/A
5. Is leak detection available ?	YES	NO N/A
6. Is a self contained breathing apparatus (SCBA) equipment needed?	YES	NO N/A
6A. Describe in final report		
<b>STORAGE TANKS / RESERVOIR</b>		
1. Is there a storage tank?	YES	NO N/A
2. Are the storage tanks inspected at least every 3 years?	YES	NO N/A
3. Does your storage tank meet all current requirements?	YES	NO N/A
4. Is the storage volume sufficient?	YES	NO N/A
5. Does the tank need repair?	YES	NO N/A
6. Does the storage tank leak?	YES	NO N/A
7. Has the tank deteriorated beyond repair?	YES	NO N/A
8. Is an overflow pipe installed?	YES	NO N/A
9. Is the overflow pipe properly screened?	YES	NO N/A
10. Is there a splash block below the overflow pipe?	YES	NO N/A
11. Is the hatched sealed?	YES	NO N/A
12. Is the hatch curb inadequate or missing?	YES	NO N/A
13. Is the hatch secure?	YES	NO N/A
14. Is the tank vent adequately installed?	YES	NO N/A
15. Is the vent screened?	YES	NO N/A
16. Does the tank have a drain valve?	YES	NO N/A
17. Is there a visual water level indicator?	YES	NO N/A
18. Is the water level target operative?	YES	NO N/A
19. Are there openings around the target cable?	YES	NO N/A
20. Is there a tank bedding ring?	YES	NO N/A
21. Is the tank bedding damaged?	YES	NO N/A
22. Are there any holes in the roof?	YES	NO N/A

# ARIZONA SYSTEM EVALUATION 2010

<b>PRESSURE TANK</b>			
1. Is there a pressure gauge?	YES	NO	N/A
2. Is there a bottom drain valve?	YES	NO	N/A
3. Is there a water level sight glass?	YES	NO	N/A
4. Do the booster glands leak?	YES	NO	N/A
5. Is there a blowoff valve for excess air?	YES	NO	N/A
6. Is there excess air?	YES	NO	N/A
7. Is there a safety relief valve?	YES	NO	N/A
8. Does the system have more than one booster pump?	YES	NO	N/A
9. If yes, are the pumps set to operate lead / lag?	YES	NO	N/A
10. Are replacement pumps on hand or easily obtainable?	YES	NO	N/A
11. How often do the pumps cycle on and off during peak demand?	_____	N/A	
12. Does the system pressure drop during peak demand?	YES	NO	N/A
12A. Describe in final report.			
<b>DISTRIBUTION SYSTEM</b>			
1. Does your system have a cross-connection control and backflow prevention program?	YES	NO	N/A
2. Do cross-connections exist?	YES	NO	N/A
3. Are there leaks in the system?	YES	NO	N/A
4. Do you have a routine leak detection and repair program?	YES	NO	N/A
5. Does your system calculate and control water loss?	YES	NO	N/A
6. Are the mains at least 3-feet deep?	YES	NO	N/A
7. Is the system subject to freezing?	YES	NO	N/A
8. Is the pipe material approved?	YES	NO	N/A
9. Is the water main too close to the sewer main?	YES	NO	N/A
10. Does your system have accurate maps of the distribution system?	YES	NO	N/A
11. Is your service area clearly defined?	YES	NO	N/A
12. Are all customers metered?	YES	NO	N/A
13. Are there enough valves to isolate distribution lines to minimize the impact of water outages?	YES	NO	N/A
14. Are mainlines typically looped?	YES	NO	N/A
15. If no, are there plans to do so and when?      Describe in final report			

# ARIZONA SYSTEM EVALUATION 2010

FIRE HYDRANTS			
1. Is the system designed to provide fire flow?	YES	NO	N/A
1A. If yes, are there sufficient fire hydrants?	YES	NO	Number _____
2. How often are fire hydrants flushed?	YES	NO	N/A
3. Are flush valves or hydrants located at the end of branched lines?	YES	NO	N/A
4. Are system mainlines properly sized?	YES	NO	N/A
SPRINGS AND SURFACE WATER SOURCES			
1. Does the spring box or surface water source provide adequate flow during all seasons?	YES	NO	N/A
2. If not, is there an alternate supply available?	YES	NO	N/A
3. Is the spring box properly constructed?	YES	NO	N/A
4. Does the spring box need to be repaired or replaced?	YES	NO	N/A
5. Is the spring box secure?	YES	NO	N/A
6. Is there an overflow pipe?	YES	NO	N/A
7. Is there an overflow pipe screen?	YES	NO	N/A
WELL			
1. Is the well near or in a flood zone?	YES	NO	N/A
2. Is the well site properly graded?	YES	NO	N/A
3. Is the slab adequate?	YES	NO	N/A
4. Is the well casing annulus sealed?	YES	NO	N/A
5. Is the well seal / repair adequate?	YES	NO	N/A
6. Are there any direct openings into the well?	YES	NO	N/A
7. Is the casing at least 12-inches above the slab?	YES	NO	N/A
8. Is a well vent installed?	YES	NO	N/A
9. Is the well vent installed properly?	YES	NO	N/A
10. Is the well vent properly screened?	YES	NO	N/A
11. Is the sampling tap properly installed?	YES	NO	N/A
PUMPS			
1. Is the vacuum relief valve installed?	YES	NO	N/A
2. Is the vacuum relief valve screened?	YES	NO	N/A
3. Is the vacuum relief valve leaking?	YES	NO	N/A
4. Is the lubricant proper for a lower turbine pump bearing?	YES	NO	N/A

## ARIZONA SYSTEM EVALUATION 2010

5. Is the required check valve on the pipe properly installed?	YES NO N/A
6. Is the check valve defective?	YES NO N/A
<b>TREATMENT</b>	
1. Is the water treated?	YES NO N/A
What type of technology is used for treatment? Describe in final report.	
2. Do you regularly inspect and maintain your treatment facilities such as chemical feed pumps, filters, chlorination equipment, meters and testing equipment?	YES NO N/A
3. Are your treatment facilities manned whenever they are operating?	YES NO N/A
4. If no, are the plants automated with appropriate alarms and shut-off valves?	YES NO N/A
5. Do you keep records of your treatment plant operations including flows, chemicals added, dose rates, time of operation, and water quality performance tests?	YES NO N/A
6. Is there a water supply enclosure?	YES NO N/A
<b>TURBIDITY</b>	
1. Does the system have continuous turbidity sampling?	YES NO N/A
2. Is the required turbidity sampling being performed?	YES NO N/A
3. Influent turbidity range:	
4. Effluent turbidity range:	
5. Is the Influent turbidity subject to rapid fluctuations?	YES NO N/A
6. Is a 4-hour sample taken?	YES NO N/A
7. Is there a turbidity log book?	YES NO N/A

## ARIZONA SYSTEM EVALUATION 2010

8. Are turbidity standards kept on-site?	YES NO N/A
8A. If no, please explain:	
9. Are the turbidity standards less than 3 years old?	YES NO N/A
10. Is the backwash based on reaching 0.5 Nephelometric Turbidity Units (NTU)?	YES NO N/A
<b>COAGULATION</b>	
1. Is there coagulant feed equipment?	YES NO N/A
2. Is the coagulant feed equipment operable?	YES NO N/A
3. Is there polymer feed equipment?	YES NO N/A
4. Is the polymer feed equipment operable?	YES NO N/A
5. Are the mechanical mixers operable?	YES NO N/A
6. Is there adequate coagulant mixing time?	YES NO N/A
7. Is the chemical storage and handling adequate?	YES NO N/A
8. Is the chemical application safe?	YES NO N/A
<b>FLOCCULATION</b>	
1. Are the mechanical mixers adequate?	YES NO N/A
2. Are the mechanical mixers operable?	YES NO N/A
3. Is the floc visible?	YES NO N/A
4. Is a daily jar test performed?	YES NO N/A
<b>SEDIMENTATION</b>	
1. Is the sludge removal equipment operable?	YES NO N/A
2. Are the weirs short circuiting or not level?	YES NO N/A
3. Is there excess sludge on the bottom of the clarifier?	YES NO N/A

# ARIZONA SYSTEM EVALUATION 2010

<b>FILTRATION</b>	
1. Maximum filtration rate (gpsfpm):	
2. Filter on-off cycling/day:	
3. Is filtration by mixed media?	YES   NO   N/A
4. Depth of filter media (inches):	
5. Date since visual check of media (months):	
6. Date since media was exchanged (months):	
<b>FILTER BACKWASH</b>	
1. Is the backwash discharged with the proper National Pollutant Discharge Elimination System (NPDES) permit?	YES   NO   N/A
2. What is the backwash flow rate (gpm or gpsfpm):	
3. Is there capability for filter backwash?	YES   NO   N/A
4. Is the backwash water supply adequate (>200 gal/sf)?	YES   NO   N/A
5. Filter to waste after backwash?	YES   NO   N/A
6. Filter to waste after startup?	YES   NO   N/A
7. Is the backwash based on run time?	YES   NO   N/A
8. Is the backwash based on pressure differential?	YES   NO   N/A
9. Is the filter media depth sufficient?	YES   NO   N/A
<b>LAGOON SYSTEM</b>	
1. Is the lagoon decant properly handled?	YES   NO   N/A
2. Is there excessive vegetation at lagoon water line?	YES   NO   N/A
3. Is the lagoon berm eroding or inadequate?	YES   NO   N/A
4. Is there less than 3 feet of freeboard on the lagoon?	YES   NO   N/A

# ARIZONA SYSTEM EVALUATION 2010

PART III. MANAGERIAL CAPACITY			
MANAGEMENT			
1. Do you have written job descriptions for all positions so that employees know their responsibilities?	YES	NO	N/A
2. Do you have written personnel policies?	YES	NO	N/A
3. Does your system maintain a staffing and organizational chart that indicates reporting relationships of system personnel?	YES	NO	N/A
4. Does your system periodically review its safety programs?	YES	NO	N/A
5. Is the individual in charge of the system clearly defined?	YES	NO	N/A
6. Does the individual in charge of system operation have other responsibilities unrelated to the water system?	YES	NO	N/A
7. If yes, how much time is dedicated to these other responsibilities? Describe in final report.			
8. For systems that contract for system operation or management. Do you have a valid (signed) contract that specifies the contractor's duties and responsibilities related to your system?	YES	NO	N/A
9. Are sufficient records kept for compliance and reporting requirements?	YES	NO	N/A
10. Is routine maintenance performed?	YES	NO	N/A
11. Is the system frequently out-of-operation?	YES	NO	N/A
12. Is the water supply frequently depleted?	YES	NO	N/A
13. Are user complaints being received?	YES	NO	N/A
14. Did the system begin construction with an Approval to Construct (ATC)?	YES	NO	N/A
15. Is the system operating with an Approval of Construction (AOC)?	YES	NO	N/A
16. Does the system have the required 'as-built' drawings?	YES	NO	N/A
17. Does construction conform to the approved plans?	YES	NO	N/A
18. Is the Operations & Maintenance manual available?	YES	NO	N/A
19. Does the system have a microbiological site sampling plan?	YES	NO	N/A

## ARIZONA SYSTEM EVALUATION 2010

<b>OWNERSHIP AND GOVERNANCE</b>		
Describe in final report your governance structure /ownership (i.e., elected board, council, appointed, sole ownership, other.)		
1. Is the system a "for profit" or a "not for profit" entity?	FOR PROFIT	NOT FOR PROFIT
2. Does the governing body meet on a regular basis?	YES	NO N/A
3. Is an annual budget prepared and reviewed at board or council meetings?	YES	NO N/A
4. If applicable, are by-laws, resolutions, and/or ordinances up-to-date?	YES	NO N/A
5. Do you have a copy of the State documents (charter, Certificate of Public Necessity, license, or permit) that allows you to operate as a public water system?	YES	NO N/A
6. Are there any special conditions or limitations on your permit to operate as a public water system?	YES	NO N/A
6A. If yes, describe in final report.		
7. For systems that use, but do not own, land or facilities that are essential to water system operation: Is there a valid long-term contract (i.e., lease) between your water system and the owner of the land or facilities essential to the operation of your system?	YES	NO N/A
8. For systems that have a single owner: Does the system have a contingency plan for continuing operation if the owner becomes incapable of carrying out his/her responsibilities?	YES	NO N/A
<b>TRAINING AND EXPERIENCE</b>		
1. Do you know where to obtain ongoing training for system managers?	YES	NO N/A
2. Does your system manager have experience or training in utility management?	YES	NO N/A
3. Does your system manager have experience or training in drinking water regulations?	YES	NO N/A
4. Does your system manager have experience or training in resource management (i.e., personnel, budget, facilities)?	YES	NO N/A
<b>CUSTOMER RELATIONS</b>		
1. Do you prepare an annual Consumer Confidence Report for your customers on the status of your water system and water quality?	YES	NO N/A
2. Does your system strive for quality service and to be responsive to customer needs?	YES	NO N/A
3. Do you give notice to your customers on proposed policy, rates, and other significant changes?	YES	NO N/A
4. Do you provide notice to customers of planned water outages or other actions which could disrupt their supply?	YES	NO N/A
5. Did you submit your consumer confidence report to ALL your customers?	YES	NO N/A
5A. If yes, by the due date?	YES	NO

## ARIZONA SYSTEM EVALUATION 2010

RULES OR POLICIES			
1. Have you established rules or policies that define the conditions for receiving water service?	YES	NO	N/A
2. Have you established rules or policies defining customer responsibilities?	YES	NO	N/A
3. Have you established rules or policies defining the management of the system (e.g. setting rates, payments, meters, cross-connection control)?	YES	NO	N/A

# ARIZONA SYSTEM EVALUATION 2010

## PART IV. FINANCIAL CAPACITY

### REVENUE SUFFICIENCY AND CREDIT WORTHINESS

1. Do your system's revenues cover expenses?	YES NO N/A
Does your rate structure produce income to cover:	
1A. Current expenses	YES NO N/A
1B. Replacement Costs	YES NO N/A
1C. Reserves	YES NO N/A
2. Does your system have the ability to repay existing debt?	YES NO N/A
3. Does your system have specific rate and billing procedures for customers?	YES NO N/A
4. Does your system prepare an annual budget?	YES NO N/A
5. For this fiscal year, are you on target with budgeted income and expenses?	YES NO N/A
6. Have you assessed the remaining life of your facility and developed a schedule for its replacement?	YES NO N/A
7. Does your system prepare a capital budget, or have a reserve account?	YES NO N/A
8. Does your system have an emergency budget?	YES NO N/A

### FISCAL CONTROLS

1. Does your system have a long-range financial plan?	YES NO N/A
2. Do you review your rate structure annually?	YES NO N/A
Do you use any of the following fiscal controls:	
3. Monthly financial statements	YES NO N/A
4. Monthly review of financial statements by board, council, or owner	YES NO N/A
5. Annual audit	YES NO N/A
6. Written financial policies	YES NO N/A
7. Rate structure reviewed annually	YES NO N/A
8. Other fiscal control; _____	YES NO N/A
9. Are all contractual obligations being met?	YES NO N/A

# ARIZONA SYSTEM EVALUATION 2010

<b>PART V. WATER SYSTEM SECURITY</b>	
<b>STRUCTURES</b>	
1. Does the system have an <b>Emergency Operation Plan (EOP)</b> that has task-specific steps to perform in case of an emergency?	LAST UPDATE: _____
1A. Updated and available at water facility?	YES NO N/A
1B. Complete with current information (name, address, telephone and fax number, and email address of ADEQ and local health department)?	YES NO N/A
2. Does the documentation include a site-specific <b>Vulnerability Assessment (VA)</b> ?	LAST UPDATE: _____
3. Does the site need general clean-up?	YES NO N/A
4. Is the site properly fenced?	YES NO N/A
5. Is the well building damaged?	YES NO N/A
6. Is the well building secure?	YES NO N/A
7. Is the security fence damaged?	YES NO N/A
8. Is the security fence locked?	YES NO N/A
9. Is the state well number posted?	YES NO N/A
10. Are phone numbers posted?	YES NO N/A
11. Is each active well and /or surface intake area inspected on an regular schedule?	YES NO N/A
12. Is watershed adequately patrolled?	YES NO N/A
13. Are all facilities regularly and thoroughly inspected?	YES NO N/A
14. Where possible, is every access to water (outside clarifier, clearwell, reservoir, manhole, etc.) locked and/or fenced?	YES NO N/A
15. Is protection provided to prevent a vehicle from hitting plant or other facilities?	YES NO N/A
16. Are all stored chemicals protected from vandalism and accidents?	YES NO N/A
17. Are all existing emergency interconnections to other water supply sources functional and exercised on a regular basis?	YES NO N/A
18. Are all treatment plants, storage tanks, pump stations, and other remotely-located facilities connected to a main control station via telemetering, SCADA, or equivalent?	YES NO N/A
19. Is a backup or exterior connection for electrical power supply provided?	YES NO N/A
20. Are fire/smoke alarms provided within all structures?	YES NO N/A
21. Is a finished water chlorine residual low-level alarm provided?	YES NO N/A
22. Are all buildings (including walls, roof, windows, etc.) constructed to commercial grade standards?	YES NO N/A

# ARIZONA SYSTEM EVALUATION 2010

<b>KEYS</b>		
1. Are distribution and number of keys known and controlled?	YES	NO N/A
2. Are all keys labeled as "DO NOT DUPLICATE"?	YES	NO N/A
3. Are local emergency departments provided with access keys?	YES	NO N/A
4. Are keys always removed from all unattended equipment and locks?	YES	NO N/A
<b>FENCING</b>		
1. Are entire perimeters of treatment plant property, storage tank, and wellhead adequately fenced and gate(s) kept locked?	YES	NO N/A
2. Is all fencing at least 10' high, with inward-facing barbed wire on top, including on entrance gate(s)?	YES	NO N/A
3. Is all fencing, including gate(s), secure to ground to prevent access under fence?	YES	NO N/A
4. Is fence at least 6' higher than any structure or landscaping ?	YES	NO N/A
<b>LIGHTING</b>		
1. Is entire perimeter of the facility illuminated with lighting fixtures?	YES	NO N/A
2. Is entire perimeter of facility illuminated such that all shadows and dark areas are eliminated?	YES	NO N/A
3. Is lighting provided in parking lots, treatment bays, and other areas with limited staffing?	YES	NO N/A
<b>ENTRANCE DOORS</b>		
Are all:		
1. Built of commercial grade with metal frame construction?	YES	NO N/A
2. Outside hinges hidden/protected from vandalism?	YES	NO N/A
3. Provided with commercial grade, one-sided lock?	YES	NO N/A
4. Provided with push ("panic") bar release on inside of door?	YES	NO N/A
5. Visitor entrances provided with a doorbell?	YES	NO N/A
6. Doors and locks in good condition?	YES	NO N/A
<b>WINDOWS</b>		
1. Are all the windows (including on doors) covered with metal security mesh?	YES	NO N/A
2. In case broken or opened, are all windows wired to loud audible alarm and to automatic telephone dialer or central station alarm?	YES	NO N/A

## ARIZONA SYSTEM EVALUATION 2010

<b>FORMS</b>	
1. Are emergency telephone numbers (including County or State, ambulance, police, FBI, spill response) current and prominently displayed at each telephone?	YES NO N/A
2. Do you have a list of phone numbers of those to call in case of an emergency, plumbers, engineers, health officials?	YES NO N/A
3. Do you have any emergency contract agreements for your system operates (e.g., emergency water interconnections and alternative sources)?	YES NO N/A
4. Are Material Safety Data Sheet (MSDS) and chemical response information present for all stored chemicals?	YES NO N/A
<b>WRITTEN PLANS</b>	
1. Is a chain of command and emergency call list established, updated annually, and prominently displayed?	YES NO N/A
2. Does a written security program plan, which employees are frequently trained in and which is reevaluated periodically, exist?	YES NO N/A
3. Are all employees trained on how to handle a threat? Written response procedures should be provided and practice drills should be conducted frequently.	YES NO N/A
4. Are detection, response, and notification issues discussed with public health officials and a protocol established?	YES NO N/A
<b>PROCEDURES</b>	
1. Can operational procedure times be varied so as not to reveal working patterns?	YES NO N/A
2. Is a daily log used and initialed by last person who leaves the plant to verify that all (specific) doors and windows are locked, appliances are off, nightlights are on, and that entrance door is locked and alarm on?	YES NO N/A
3. Are all employees fully aware of the importance of reporting any unusual entry point or distribution system monitoring result (such as chlorine residual), unusual customer complaint on water quality, or illness among the utilities' customers that may be associated with the water? A log of all such events should be maintained.	YES NO N/A
4. Is access to computer networks and control systems controlled, and passwords changed frequently?	YES NO N/A
5. Is cross training provided between operators ?	YES NO N/A
6. Are Memo Of Understanding (MOU's) with other agencies, particularly in regard to emergency response, reviewed and updated periodically?	YES NO N/A
7. Are security measures discussed with all contractors/subcontractors prior to them working on site?	YES NO N/A

## ARIZONA SYSTEM EVALUATION 2010

<b>LAW ENFORCEMENT AGENCIES</b>			
1. Are police departments (daytime and nighttime coverage) familiar with system facilities?	YES	NO	N/A
1A. Do police conduct routine patrols of facilities?	YES	NO	N/A
1B. Are protocols established for reporting and responding to threats and other emergencies? Protocols should be updated annually.	YES	NO	N/A
2. Is staff aware to immediately report any criminal threat, security breach, attack, suspicious behavior, etc. on the water utilities?	YES	NO	N/A
3. Are copies of operational procedures and system call list provided to police departments and emergency management personnel?	YES	NO	N/A
4. Was a system facilities security survey conducted by the police department?	YES	NO	N/A
<b>EMPLOYEES</b>			
1. Does each employee display a personal sealed photo ID at all times?	YES	NO	N/A
2. Are background security checks conducted on employees prior to hiring?	YES	NO	N/A
2A. If yes, are checks conducted periodically on all existing staff?	YES	NO	N/A
3. Upon employee termination, are passcodes changed, and keys, IDs and access cards returned?	YES	NO	N/A
<b>NON-EMPLOYEE ACCESS</b>			
1. Is a policy established for employees to limit/question/scrutinize any visitor, contractor, or stranger in facilities?	YES	NO	N/A
2. Are all chemical and other supply deliverers required to show proper identification and to sign-in?	YES	NO	N/A
3. Are chemicals inspected prior to allowing on site?	YES	NO	
4. Do employees observe delivery personnel during deliveries?	YES	NO	N/A
<b>NEIGHBORS</b>			
1. Are important facility telephone numbers given to neighbors of all system facilities?	YES	NO	N/A
2. Is an informal "Neighborhood Watch" program established around each system facility?	YES	NO	N/A
